DESIGN & BUILD

Integrity, reliability,
and performance.

WELCOME TO HOXBOX DESIGN & BUILD.

A CONSTRUCTION COMPANY & INTERIOR DESIGN AGENCY WHO MERGED TO CREATE SOMETHING WE ARE VERY PROUD OF.

Based in Hoxton, London, we're at the heart of a dynamic business community where standing out matters. But being practical, workable and flexible are essentials too, which is why we prioritise thoughtful design and clear consultation with our clients in doing what Hoxbox does best - **creating optimal, transformative spaces, with a whole lot of care and love.**

With over 3 decades of experience, we manage every aspect of the design process, project management, build and fit-out, providing a friendly and reliable service, ensuring that each project meets the unique needs and budget of all our clients. Our in-house design and build team handles every stage; from pre construction, budget management, design, Build, furniture installation and handover. Whether you're fitting out a new space, upgrading or preparing for hybrid working, we provide a single, accountable partner who delivers on time, on budget and provides excellent aftercare.

We'll see the entire project through, fuss-free for you.

WHY HOXBOX?

First our design team spends time understanding who you are and what you want to achieve. We work closely with your staff, we listen and together create, build, produce and deliver, offering every stage and service under one roof.

By providing a friendly and reliable 'one stop shop' solution, our D&B projects are typically completed around 30% quicker than the traditional method.

OUR SERVICES

Pre construction Planning, Design & Build, Space Planning, Interior Design, 3D Visualisation, MEP Design, Fit-out, Refurbishment, FF&E procurement, Furniture consultancy and supply, Upholstery, Commercial branding, Signage, Vinal wrap, Faux Plants and Aftercare.

OUR PRE CONSTRUCTION SERVICE

Pre-construction services are the preliminary planning, budgeting, and design analysis phases conducted by a contractor before formal construction begins. These services typically include feasibility studies, value engineering, budget estimations, scheduling, constructability reviews, and permitting. They are usually formalised via a Pre-Construction Services Agreement (PCSA) to reduce project risk.

KEY COMPONENTS OF PRE-CONSTRUCTION SERVICES

Cost Estimation & Budgeting: Establishing accurate budget estimates, cost plans, and Bills of Materials to ensure the project is financially viable.

Value Engineering: Analyzing design choices to maximize value and minimize costs without sacrificing quality.

Constructability Reviews: Evaluating plans to ensure they can be efficiently built, which minimizes errors and disputes.

Scheduling & Planning: Developing a master schedule, identifying long-lead items, and planning logistics.

Risk Assessment & Mitigation: Identifying potential risks (e.g., site conditions, legal issues) early.

Permitting & Approvals: Handling necessary approvals and collaborating with local authorities on compliance.

Site Investigations: Assessing site conditions before mobilization.

A SELECTION OF CASE STUDIES

CASE STUDY

BRITISH MUSEUM

London WC1 / 50,000 sq ft / 9 weeks

Client: CBRE, on behalf of The British Museum

Project Overview

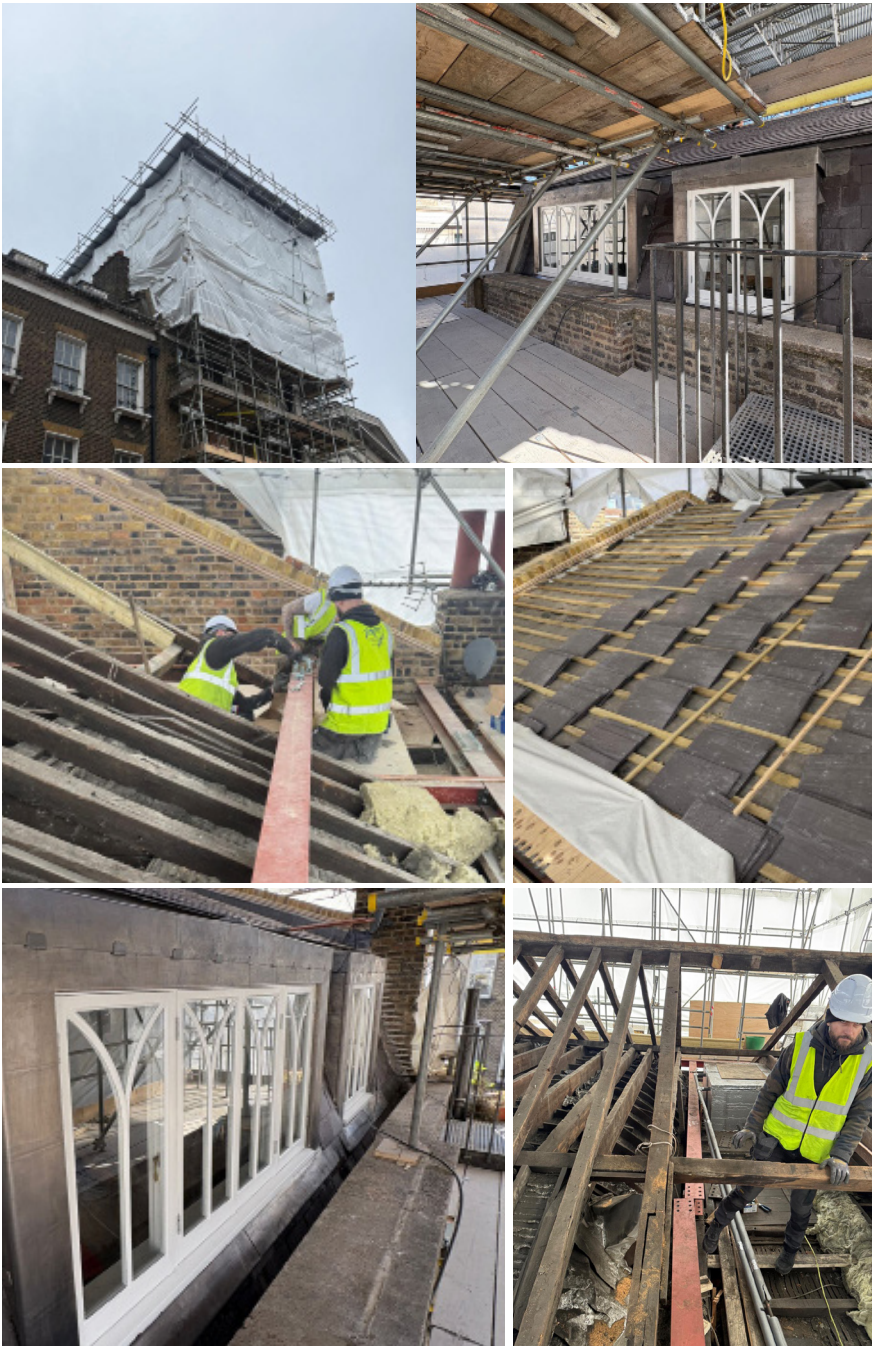

Appointed by CBRE to deliver a highly sensitive refurbishment at 89 Great Russell Street, this project involved the full replacement of the roof structure on a Grade I listed building forming part of The British Museum estate. The work demanded meticulous planning and execution within a live heritage environment of national significance.

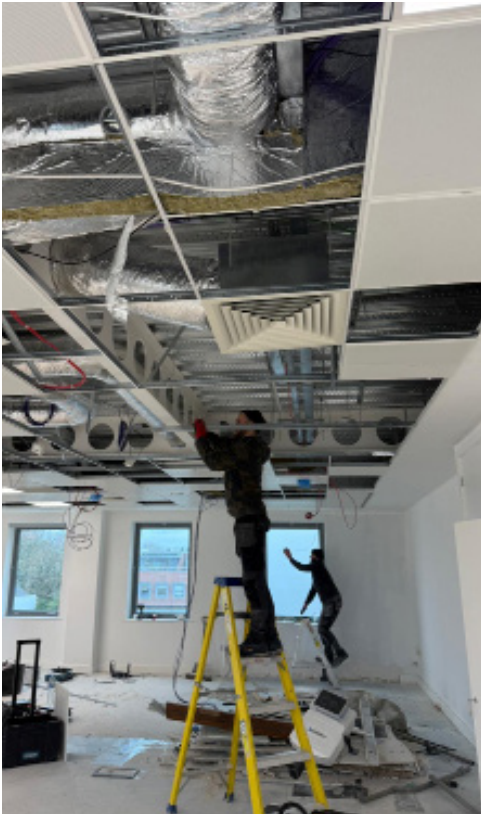

Scope and Delivery

The project encompassed the renewal of the existing roof fabric, including the installation of a handcrafted Welsh slate roof and the construction of traditional lead-clad dormers. All interventions were carried out in strict accordance with historic building conservation standards, ensuring that materials, detailing, and workmanship reflected the original 19th-century character while meeting contemporary performance requirements.

Working within the Museum's operational constraints, the team coordinated carefully with heritage consultants and conservation officers to balance preservation with modern technical demands.

The project was delivered to programme within nine weeks, with minimal disruption to the surrounding Museum environment.

CASE STUDY

ESHER OFFICE DELAPIDATION

Surrey KT10 / 700 sq ft / 5 weeks

Scope of Works:

Comprehensive dilapidation and reinstatement of a Level 2 office suite. The project involved full strip-out back to the core structure, removal of internal partitions, ceilings, and finishes. Following this, new wall linings and finishes were reinstated in accordance with the landlord's specification, including redecorations and final handover preparation for the incoming tenant.

CASE STUDY

NEW CITY COLLEGE (SEN)

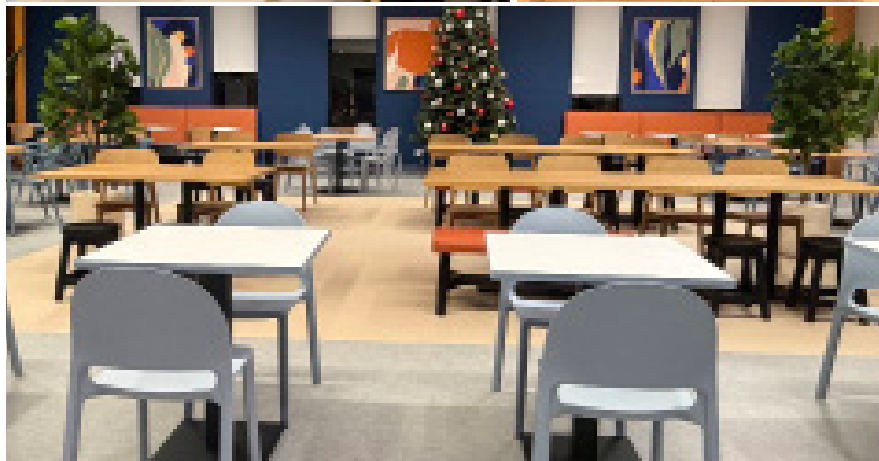

Hornchurch RM11 2LL/ 50,000 sq ft / 7 weeks

New City College with Special Educational Needs (SEN) and disabilities, a dedicated centre at the Ardleigh Green campus. We converted an existing ground floor science block into a SEN centre, with the primary aim to provide a nurturing and inclusive learning environment, the project has seen the existing building reconfigured, a prime example of the importance of creative re-use in the built environment:

Included:

- New primary entrance and reception
- Sensory room with specialist acoustic ceiling panels
- 10 general purpose classrooms
- Kitchen classroom
- Life skills studio
- IT classroom
- Ancillary offices and storage
- Speech & Language and Job Coaching meeting rooms

CASE STUDY

SODEXO KITCHEN WORKS RESTAURANT - IPSWICH HOSPITAL

Ipswich / 50,000 sq ft / 9 weeks

Project Overview

Sodexo has unveiled the second fully refurbished Kitchen Works restaurant at Ipswich Hospital, introducing a modern dining space incorporating new digital ordering services, to provide busy time-pressed frontline staff, visitors and patients with an enhanced, convenience-led food services experience.

The Kitchen Works restaurant now provides a warm, welcoming, ergonomically-designed dining space featuring different seating options including traditional tables and chairs to soft-seating areas and relaxation zones.

Our team carried out all labour, flooring, decoration, electrics and joinery.

Procurement

We supplied and installed all furniture, upholstery, signage, vinyl graphics, faux plants.

CASE STUDY

SODEXO KITCHEN WORKS RESTAURANT - COLCHESTER HOSPITAL

Colchester/ 50,000 sq ft / 10 weeks/350K

Project Overview

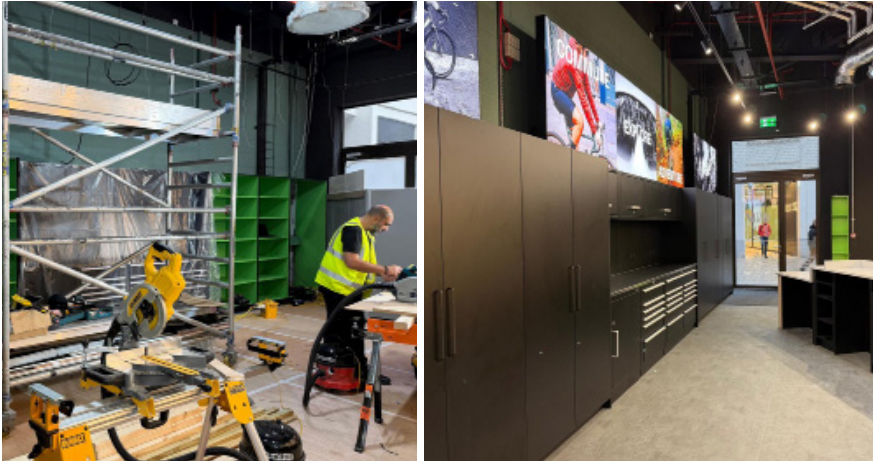

A full refurbishment of the servery and restaurant at Colchester Hospital, delivered in just 10 weeks. The project marked the launch of a new brand restaurant for Sodexo's hospital division, transforming the space into a modern, functional, and welcoming environment aligned with the new identity. The design of the new Kitchen Works restaurant has been carefully considered to reduce queuing times, improve the speed of ordering and collection of food to help busy hospital staff, particularly frontline teams, maximise their break times and allowing more time for customers to enjoy their food.

Our team carried out all build, flooring, decoration, electrics and joinery.

Procurement

We supplied and installed all furniture, upholstery, signage, vinyl graphics, faux plants.

CASE STUDY

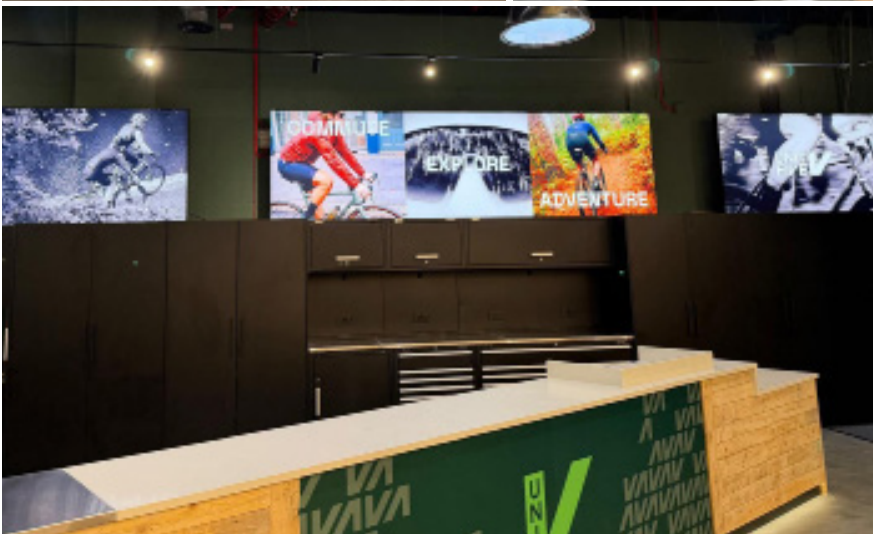

UNIT 5 - BIKE STORE

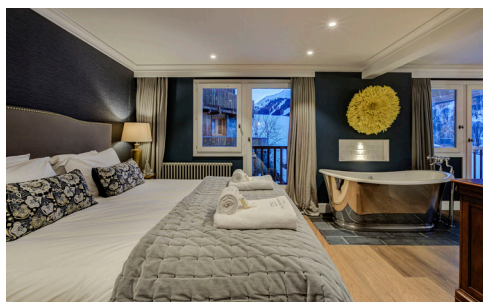

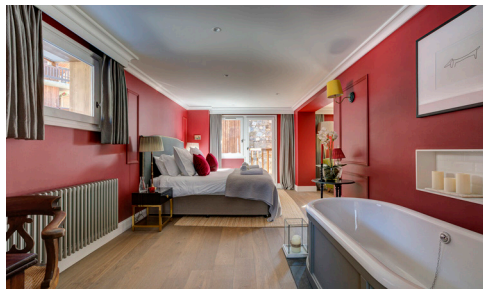

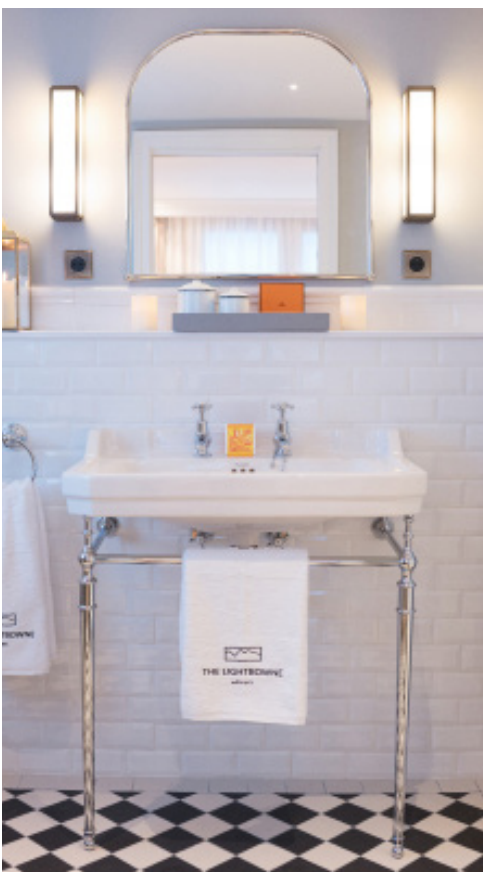

DESIGN & BUILD - GSK

London WC1 / 3000 sq ft / 10 weeks/

Project Overview

Unit 5 is a bicycle retail and repair facility delivered for Glaxo Smith Kline beneath their central London headquarters. Designed to support staff cycling, the space provides on-site bike servicing alongside a retail offer of new and second-hand bicycles, accessories and essentials. Delivered as a full design and build project, the scheme includes build, bespoke joinery, finishes, graphics, signage and fit-out—creating a highly functional and successful environment ready for immediate use.

THE LIGHTBOWNE SKI CHALET

Meribel/ 430 SQ M / 4,628 SQ FT/ 18 months

Full design and build/Project management

This luxury ski chalet in Méribel epitomises refined alpine living, where craftsmanship and creativity come together in a truly bespoke experience. Completed over 2 years, this 4,628-square-foot retreat was originally 15 small rooms, divided into 7 distinctive suites—each with its own identity. The attention to detail is second to none: every space has been thoughtfully composed to balance sophistication with comfort.

Each suite evokes a ‘Soho House Style’, blending curated antiques with modern pieces and fashionable oversized artworks. Textures and materials play in harmony—aged brass, velvet, timber, and stone. Open-plan bedrooms feature freestanding statement baths, with high-end bathrooms, bespoke joinery and luxury finishes.

Beneath the main level, a private spa—crafted into the structure’s foundation—offers a sunken jacuzzi, steam room, and wellness lounge, uniting architectural precision with sensory calm.

In every detail, the Méribel chalet captures the essence of modern alpine luxury: distinctive,quirky and effortlessly stylish. A very special project indeed.

OTHER SERVICES

HOX BOX FURNITURE

FURNITURE CONSULTATION

Our Furniture consultation service provides carefully considered furniture selection, design, and planning. We have direct contact with numerous wholesalers, both in the UK and Europe. We provide clients with high-quality furniture at the most competitive prices while ensuring a personable and transparent service.

FF&E PROCUREMENT

This specialized process of sourcing, purchasing, delivering, and installing Furniture, Fixtures for commercial, hospitality projects takes experience and planning. Whatever is required to complete a Design & Build Project, HOXBOX can supply.

HOX BOX JOINERY

HOXBOX JOINERY

OUR in-house joinery division provides bespoke, high-quality JOINERY—such as kitchens, wardrobes, doors, and specialist cabinetry—all manufactured, assembled, and finished off-site before being installed by the team. This integrated approach streamlines the construction process by combining design, manufacturing, and installation under one roof, ensuring better quality control and smoother project management.

HOX BOX PLANTS

HOXBOX PLANTS

We found at HOXBOX that our clients were struggling with the upkeep of real plants and the additional cost to do so. We offer a Faux plant design service, on site, offering a range of high-quality, easy to clean, artificial plants at excellent prices and sizes.

Our artificial plant displays are the ideal alternative where living plants aren't practical, or conditions won't support living plant displays. They provide a design-led yet no maintenance solution to bringing attractive greenery to your spaces. From over 2m trees, to small counter plants.

HOX BOX SIGNAGE

HOXBOX SIGNAGE

We provide a diverse selection of custom interior signs created to enhance and define your space. Our expertise in creating distinctive interior signage solutions ensures that every aspect of your business, whether inside or out, communicates your brand's values and professionalism. Our in house graphic design team can help you with design solutions, provide visuals and artwork.

We can create lightboxes, acrylic lettering, vinyl graphics, wayfinding, wall murals and more.
